IDENTIFIERS Nontraditional Programs

## ABSTRACT

Part of a government report on "Efficiency in Higher Education," this study dealt with the cost of existing or proposed external degree or non-traditional programs in adult higher education, an area which is lacking in substantive cost data. Twenty-seven institutions were contacted because they were believed to have non-traditional programs; high interest was expressed by administrators in exchanging information on the subject. Thirteen of these institutions responded with data while fourteen had nothing or limited data to report. This study has included cost data from Brigham Young University, Columbia University, Empire State College, Florida International University, Goddard College, Harvard University, International University for Independent Study, New York University, Shasta College, State of California (Bureau of Adult Education), U.C.L.A. Veterans' Program; University Without Walls (Antioch College), Wayne State University/University of Michigan, and University of South Florida. A list of 70 references also has been included as sources of additional information on costs of special and external degree programs. (EA)

### Introductory Remarks

With the Non-Traditional Degree Program being introduced by colleges and universities in the United States at the rate of one a week, according to the December 31, 1971, edition of the N.U.E.A. "Newsletter," it is not surprising that the financing of higher education has become such an important part of the total planning process. What is surprising however, is the incredible lack of substantive data on the costing of existing or proposed external degree programs.

Administrators themselves, are the first to recognize and to deplore these inadequacies. Fully aware of the need to introduce efficient accounting methods into their systems, they find nevertheless that the very nature of the new programs often precludes the introduction of appropriate controls because of a number of complicating factors.

The "External Degree" or "Non-Traditional" program as it is becoming known, is a recent innovation which reflects the changing image of higher education. Because of the relatively sudden emergence of diverse patterns in adult learning, institutions are independently exploring the potential of new forms, designs, and content. Consequently, no two degree programs are alike. If indeed, they possess any characteristics in common, it is their uniqueness and individuality.

It is entirely consistent therefore, that as the programs vary in their goals and objectives, so do they vary in their implementation. Although the Commission on Non-Traditional Study has identified ten kinds of major degrees, the NUEA "Newsletter," by excluding non-traditional programs for full-time students, has managed to reduce the categories to three. These include (1) wholly independent study degrees awarded on the basis of examinations (external degrees); (2) a mixture of independent study and organized learning experiences, sometimes on campuses, sometimes on site (special degrees); (3) organized learning experiences for part-time students at off-hours on campus (evenings, weekends) or at off-campus sites (special degrees).

The variations in adult degree programs are not limited to either content nor methodology, but extend to all elements of the design itself. As a result, only limited generalizations will be made with respect to the actual costs of the Non-Traditional programs since they must be studied on an individual basis.

Actually, a great many external degree programs that are operating without major grants or "seed money" from outside sources, have looked to the parent institution for funding of pilot projects during the early stages. In such cases, the accounting records have not for the most part, been differentiated from the cost data of the existing traditional program. It is not at all uncommon for resources and faculty to be shared, and for student fees to become part of the all-university income. Minor adjustments

are made for occasional faculty that supplement the regular instruction, and incremental expenses are insignificant or non-existent.

In other cases, administrators, recognizing the need to find more economically feasible means of supporting their programs, have been forced to seek additional sources of financing outside of their schools. As a result, universities are now engaging in contract continuing education, experimenting with unusual consortia arrangements, or seeking aid from governmental agencies. These systems in turn, will reflect varying methods of reporting direct and indirect costs of Non-Traditional degrees.

The twenty-seven selected institutions have been contacted because they were believed to have Non-Traditional programs. Of those institutions that responded to date to a request for information, fourteen either had nothing to report, or admitted the inadequacy of their data. (The amount of interest expressed by administrators in the findings of this study was surprisingly high and many desired to exchange information on the subject.)

Administrators of thirteen institutions sent what data they had, with reservations regarding the validity of such limited material, or they gave explanations for the tentativeness of their figures and promised more complete budgetary reports as their "proposals" eventually became a reality.

"We have not made any sophisticated analyses, but the following essentials might be of some assistance to you."

Richard H. Henstrom, Assist. Dean  
BRIGHAM YOUNG UNIVERSITY

"I can give you some information, though not very detailed, about costs in the University Extension program."

Reginald H. Phelps, Chairman  
Commission on Extension Courses,  
HARVARD UNIVERSITY

"Our program is still a pilot experience . . . I am sorry that I could not have been more helpful to you at this time."

William H. Scheuerly, Assist. Vice  
President for Academic Affairs  
UNIVERSITY OF SOUTH FLORIDA

"A year from now I believe we will be in a position to provide some specific cost figures. We are establishing procedures for identifying quite precisely the costs of the various functions of the College during the coming year. I am sorry that we are not in a position to give you a more accurate accounting of various costs at this time."

William R. Dodge, Dean for Administrative Services  
EMPIRE STATE COLLEGE

" . . . (Dr. Roy Troutt, Dean, College of Liberal Studies) . . . might be able to furnish you annual reports which would be helpful, although I believe no detailed study has been made."

J. E. Burkett, Assist. Vice President  
THE UNIVERSITY OF OKLAHOMA

"I am sorry to report that at the present time, I have no cost analysis data that is available. We will have a first report out on the University Without Walls shortly which will contain some information on cost planning . . . I would be much interested in receiving a copy of your findings . . . "

Samuel Baskin, President  
UNION FOR EXPERIMENTING COLLEGES  
AND UNIVERSITIES

"The Commission shares your interest in the costs of special degree programs, but has not yet gathered information about such costs."

John A. Valentine  
COMMISSION ON NON-TRADITIONAL STUDY

"Am I right in assuming, that when this 'interesting' material is ready to share with others, we will be on the list of the others? We hope so . . . "

Mrs. Edith W. Bennett  
ERIC CLEARINGHOUSE ON ADULT EDUCATION

"I am most appreciative of the problem you face in putting together direct cost information about special degree programs . . . Quite frankly, at this moment I do not have the time, nor does my staff, to do a full-scale interpretive work-up of this data so that it would be useful to you . . ."

Thomas F. Cummings, Jr., Assistant Dean  
UNIVERSITY COLLEGE, SYRACUSE UNIVERSITY

"At this stage my associates are still analyzing material on colleges and universities. We are finding a lot of useful information, but, as you know, this is an exhausting and time-consuming part of any study.

Unfortunately we just can't provide cost information before your deadline. We'd be delighted to share our findings with you later on, however . . ."

Sidney G. Tickton  
ACADEMY FOR EDUCATIONAL DEVELOPMENT, INC.

"If you should be able to report your findings about cost for other External Degree Programs, we would be most interested to receive this information."

Francis Voight, Coordinator, External  
Degree Program  
GODDARD COLLEGE

" - - - Such data could probably be extracted from the AIM records, but there is no way we would do the study by the time you need it. Our problem is simply lack of staff to do the work."

Charles A. Wedemeyer  
UNIVERSITY OF WISCONSIN

" . . . While some of the literature in our Resource Center contains information on tuition charges for special degree programs, we are unable to provide the staff time at this time to collate these data . . . happy to give you access to our resource material here . . . or we could provide the same (research assistant) at the rate of \$6.00/hour . . . it would be no more than one or two days."

Robert J. Pitchell, Exec. Director  
NATIONAL UNIVERSITY ASSOCIATION

The S.R.E.B "has had a long interest in the subject of cost studies and has engaged in some pilot investigations. In the interests of promoting a uniform approach toward the cost-funding studies of the National Center for Higher Educational Management Systems in Boulder. However, I would be glad to chat with you by telephone in case we know about sources which have not come to your attention.

E. F. Schietinger, Director of Research  
SOUTHERN REGIONAL EDUCATION BOARD  
(We did not follow up on this)

Although the schools investigated used different methods and introduced different degree programs, there is evidence that certain patterns are beginning to appear and there is a reasonable consistency in the information as a result of some of the data that is available on major items. Consequently, it was possible to put together a spectrum ranging from the Summer Session of Brigham Young University, to the Master Program at Goddard, to the University Without Walls (UWW) Consortium with its headquarters at Antioch, with student enrollments beginning in the low hundreds, up to the budgeted number of 1675 at Empire State, New York.

Since the data presented in the following pages is self-explanatory, it has not seemed necessary to present a detailed analysis of the material. To conclude, as a matter of interest however, a few observations have been made.

1. The cost per student year is dependent upon student enrollments. The following observations invite comparison:

Wayne State projects 100 students, \$2200/student/yr. for a full term, including 8% indirect costs. With 300 students, the costs drop to \$1300/student/year.

New York University for the A.A. program has 146-178 students at \$800-\$1000/student/year, without indirect costs.

Columbia and Empire State College budget \$2000 full-time student/year.

Goddard for the Bachelor's program without overhead, runs less than \$400/student/year. On the M.A. program, they allow \$1300/student.

University X (unidentified) proposes 100 students for the beginning program at \$550/student.

2. Goddard pays its professors \$10,400 per year, per professor, while UWW pays its professors \$18-20,000 per year, per professor, indicating considerable difference in salary range with attendant effects upon costs.

3. The retrieval costs of built-in university accounting models are not presently available. Attention is called, however, to recent negotiations between Goddard and Price Waterhouse Accountants, for a complete cost analysis of all degree programs. Their contract calls for a \$5000.00 fee for a period of 18-24 months. It is anticipated that their efforts will generate useful and valid information. The company has been asked to do some systems analysis, work in student accounts, enrollments, financial aid, and budget development. Other work yet to be specified under this contract may include some consultation about setting up cost analysis procedures.

#### Conclusion:

Although the findings in the body of this paper are largely self-explanatory, we have arranged the material in the following fashion to aid the reader in an interpretation of the data.

Section A presents a list of the institutions and individuals contacted with an accompanying code to indicate the response or lack of response to date.

Section B presents pertinent highlights or the actual data of responding institutions (arranged alphabetically). Where budgetary information has been submitted, it was reproduced directly from the original reports.

Section C presents a fairly complete list of useful resources which have not been explored because of time limitations, or in other cases where contacts have been made, the indications were that they would prove to be an excellent source of information on cost data in the months ahead.

## SECTION B

Cost Data offered by responding institutions with special adult or external degree programs in operation, or in the proposal stages.

BRIGHAM YOUNG UNIVERSITY

March, 1972.

Division of Continuing Education  
234 HRCB  
Brigham Young University  
Provo, Utah 84601

Contact: Richard H. Henstrom, Ed.D.  
Assistant Dean

Remarks: "We have not made any sophisticated analyses, but the following essentials might be of assistance . . . "

1. The University and Board of Trustees approved the degree program on the basis that it was essentially self-supporting; that is, income from the program must pay for out-of-pocket costs.
2. The University offers facilities on the campus for seminars, office space, etc. In addition, special services through the treasurer's office, records, computer, etc. are available at no additional cost.
3. In preparing the budget for the program in the early stages, the attached breakdown was developed. (See next page.) Figures and statistics were supplied by the University of Oklahoma. Since the structure was basically patterned after their program, the percentage allocated to individual categories is of some interest.

The total dollar amounts were based on 150 students and that figure has not been reached yet so these comparisons cannot be evaluated. Limited experience to date indicates that these percentages figures are reasonable.

4. In addition to other items, a considerable amount has been spent from a special fund for the development of the degree. It was not expected that this would be returned through fees.

# Brigham Young University

## ADULT DECREE -- BUDGET

CLASSIFICATION	Percentage Allocated	Dollar Amount per Registration *	Dollar Amount Total Budget **
1. Administrative Services and Travel	35%	\$175.00	\$26,250.00
2. Faculty Advisement and Seminars	30%	150.00	22,500.00
3. Placement, Testing, Test Development, Evaluation, Orientation, Group Advisement	5%	25.00	3,750.00 (7,500.00***)
4. Supplies -- Postage	3%	15.00	2,250.00
5. Publications, Printing, Sales and Promotion	8%	40.00	6,000.00
6. Faculty Orientation and Executive Committee Services	2%	10.00	1,500.00
7. Research and Development	5%	25.00	3,750.00
8. Telephones -- Audio-visual and Equipment	2%	10.00	1,500.00
9. Miscellaneous Overhead and Contingency	10%	50.00	7,500.00
TOTAL	100%	\$500.00	\$82,500.00

\* Based on 150 students registering in one area and one summer seminar

\*\* One budget year based on 150 student registrants

\*\*\* There is an additional \$50.00 per student entrance fee applicable in this area

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK

March, 1972.

School of General Studies  
New York, N. Y. 10027

Contact: Ward H. Dennis  
Associate Dean

Remarks: General Studies is integrated into the Arts and Sciences at Columbia University, which also include Columbia College and the Graduate Faculties. Consequently, it is extremely difficult to allocate costs within their school or on a per-student basis.

Indirect costs are almost impossible to calculate since their courses start in the early morning and run until the late evening. Some faculty members teach their full load of courses in the School of General Studies, while others teach only one course in General Studies and the other two in the Graduate Division or the College or both.

"The closest I have been able to come per full-time student cost figure is \$2000 for 1971-72. I cannot prove this figure to be correct, neither can anyone else prove it to be incorrect. If you are willing to take it with a grain of salt, it may be useful to you.

I am very sorry I cannot be more specific, but this is one of the direct results of being an adult college integrated with a high caliber university."

EMPIRE STATE COLLEGE

February, 1972.

State University of New York  
Saratoga Springs  
New York, N. Y. 12866

Contact: William R. Dodge  
Dean for Administrative Services

Remarks: The College admitted its first students in October, 1971, and as yet there are no precise figures relative to the cost of instruction and other operational functions.

At present there are three Learning Centers in partial operation, in each instance they are staffed at a minimal level. All of the facilities for the College, including the Coordinating Center in Saratoga, which houses the administrative components of the College are rented. The rental figure averages approximately \$2.00/square foot, including maintenance and utilities with the exception of telephones at the Learning Centers and electricity and telephones at the Coordinating Center in Saratoga.

Operational costs this year are further confused somewhat by the fact that items which would normally be classified as capital equipment expenditures (office furniture, typewriters, etc.) are included in the operational budget.

Finally, because the targeted student enrollment has yet to be reached at the three Learning Centers (a projection based on a 30 to 1 student-faculty ratio), the per student costs during the current operating era is significantly higher than anticipated when the Centers are fully operational.

The next fiscal year begins April 1, 1972, and extends through March 31, 1973. The program is budgeted for \$3.2 million based on an anticipated full-time equivalent student enrollment of 1,675. During the course of the year, it is anticipated that 4 Learning Centers will be operating at full capacity.

Projected enrollments include:

1000 or more students by Sept., 1971  
10,000 students by 1975  
40,000 students by 1980

Funding: The proposal has been funded by a grant from the Ford Foundation and the Carnegie Corporation of \$1 million.

FLORIDA INTERNATIONAL UNIVERSITY

Tamiami Trail  
Miami, Florida 33144

Contact: Jules O. Pagano, Director  
External Degree Program

Remarks: In September, 1972, an external degree program will be established in the State University System of Florida. It will be a "University Without Walls."

Under the Education Contract Plan, each student would study for his degree according to an individually tailored contract that would meet his specific needs.

An initial \$350.00 registration fee will enable the student to receive counseling, evaluation, and a contract from the University. The student will pay \$100 per year tuition, up to a total \$750, and \$50/year to keep his contract active, plus whatever fees are necessary at the institution where he attends classes.

Attached is a more detailed account of the fee structure for the external degree program.

FEE STRUCTURE FOR EXTERNAL DEGREE PROGRAM

1. Application fee of \$15, non-refundable.
2. Initial fee for counseling, development of curriculum, and making of an Education Contract Plan plus first year of program support of \$350. A fee of \$100 per year until either a total of \$750 has been paid (including the initial \$350 Contract fee and the first year of program support) or the student has completed the requirements for the degree. An annual billing date will be established for each student. If the degrees are completed between billing dates, the final \$100 payment will be made at that time. This \$750 fee is for a full Education Contract Plan in force for 5 years from the date of admission.

If the student fails to pay his \$100 fee on the billing date, the contract becomes void unless he seeks a waiver for just cause prior to the billing date. Waivers for just cause will be granted to students who wish to withdraw from the program for specified periods of time and have every intention of re-entering for completion of their External Degree. Should a student's contract become void and he wishes to continue his program, he has to be re-evaluated and make a new contract, which includes the payment of the initial \$350 fee. Fees paid prior to this time will not apply.

If the student has not completed the degree program within 5 years after admission to this program, the contract may be kept alive with program support for an annual extension fee of \$50 per year, not to exceed 5 more years or a total of 10 years from the date of admission. If the student has not completed the degree requirements within the 10 year period from date of admission, the contract becomes automatically void and re-admission to the program requires re-evaluation and the making of a new Education Contract Plan.

## EXAMPLE

Fee Structure for Student who completes his Contract Plan in 5 years:	
Application	\$ 15.
Contract Fee, First Year Support of Program	350.
2nd Year	100.
3rd Year	100.
4th Year	100.
5th Year	100.
Total	<u>\$765.</u>

All students must pay regular tuition for each course taken at each institution he attends plus the authorized External Degree fees. Certain test fees like CLEP are also additional.

Jules O. Pagano, Director  
External Degree Program  
School of Independent Studies  
Division of University Services  
Florida International University  
Miami, Florida 33144

GODDARD COLLEGE

February, 1972.

External Degree Office  
Plainfield, Vermont 05667

Contact: Francis Voight, Coordinator External Degree Programs

Remarks: All information they have at this time is made available (see next page), but it should be noted that much of the indirect costs are not included.

Because of the lack of this information, the college is now in negotiation with Price Waterhouse to do a complete cost analysis of all degree programs. They anticipate that it will be 18 to 24 months before such information is available.

"If you should be able to report your findings about cost for other External Degree Programs, we would be most interested to receive this information."

EXTERNAL DEGREE PROGRAM BUDGET  
SEPTEMBER 1971 TO SEPTEMBER 1972

Administrative Support Services:

Salaries \$ 44,941

(Overhead costs such as rent, light  
heat, supplies, etc., are unknown.)

B.A. External Degree Program Costs for 350  
Full-Time Students:

Salary of Dean	\$ 15,840
Salary of Faculty (8)	82,305
Advertising	5,000
Catalogs and Supplies	1,000
Faculty (phone, travel, etc.)	3,900
Governance	2,000
Resident Period	<u>14,000</u>

TOTAL B.A. EXTERNAL DEGREE PROGRAM 124,045

(Overhead costs such as rent, light,  
heat, supplies, etc., are unknown as  
are room and board costs for students,  
although we presently charge them \$10  
per day.)

M.A. External Degree Program Costs for 120  
Full-Time Students:

Salary of Coordinator	\$ 15,400
Salary of Faculty (3)	51,700
Honoraria for Field Faculty	60,000
Office Supplies and Brochures	1,000
Core Faculty Travel	8,000
Consultants and Speakers	5,000
Expenses for West Coast Office	10,000
Boston Regional Center	<u>12,000</u>

TOTAL B.A. EXTERNAL DEGREE PROGRAM 163,100

(Overhead costs such as rent, light,  
heat, supplies, etc., are unknown.)

TOTAL EXTERNAL DEGREE PROGRAM BUDGET  
SEPTEMBER 1971 TO SEPTEMBER 1972 \$ 332,086

Incremental costs are unknown for all External Degree Programs.

HARVARD UNIVERSITY

January, 1972

Commission on Extension Courses  
739 Holyoke Center  
1350 Massachusetts Avenue  
Cambridge, Massachusetts 02138

Contact: Chairman Reginald H. Phelps

Remarks: Some information about costs in the University Extension program is unavailable, but it is not very detailed.

They have a small budget, which is fortunately well adapted to their low-cost fees. For 1970-71, 65% of the expenditures went directly into payments to instructors and assistants.

Non-instructional costs amounted to a little over 1/3; they include the usual items for running the office, publicity, some rental payments, etc.

The income was composed largely of receipts from tuition fees which amounted to 82.5% of the total income. The remainder was made up of receipts from a variety of sources, particularly from outside endowments and from some overhead payments on contracts.

No answers can be given regarding costs for the use of University facilities since they haven't any regular schedule of payments toward overhead and depreciation for the space occupied by their offices and for the use of classrooms.

They pay the University a fixed amount toward these in lieu of specified rental charges. They also receive the benefit of the University business offices in handling their accounts, but the incremental costs of this to the University are very small.

INTERNATIONAL UNIVERSITY FOR INDEPENDENT STUDY

Academy For Educational Development  
437 Madison Ave.  
New York, N. Y. 100212

Contact: AED, temporary fiscal agent and administrative assistant

Remarks: Annual tuition of \$250.  
Fees for evaluation procedures -- unspecified  
In 6th year, with 10,000 students, balanced budget is  
anticipated.

\$1 million needed to start university  
\$2 million needed for first five years of operation

NEW YORK UNIVERSITY

April, 1972.

School of Continuing Education and Extension Services  
 44 Washington Mews  
 New York, N. Y. 10003

Contact: Dean Russell F. W. Smith

Remarks: In the Evening B. A. Program in the School of Continuing Education, has a proposed budget on the basis of 80 students the first year, 140 the second and 190 the third, and a tuition of \$700/semester (half-time) is seen on the accompanying page.

The first sheet shows the expenses for three different programs for the academic year 1969-1970; the second for 1970-71; the third for 1971-72.

The information seen refers to the Evening Associate in Arts Degree Program and the Evening Associate in Applied Science (Business) Program. The school has recently received approval for an additional special degree program for adults, an upper divisional program leading to the Bachelor in Arts which will enable students to complete an evening associate's degree and bachelor's degree in their school, if they wish.

\* \* \* \* \*

It should be noted that the A. A. Degree Program has completed its sixth year and graduated its third class in June, 1970. In Fall, 1970, the student registration in the Program was 178, with the largest entering class since the inception of the Program, a total of 88 students.

During the 1969-70 school year, the A. A. in Applied Science Degree Program in Business of the School of Continuing Education, completed its fourth year. Seventy new students entered the fall term of the program, and of these, fifty-four continued into the spring term. Of the three previous classes, some seventy-six remained. Thus the total student enrollment was one hundred forty-six. At the beginning of the fifth entering class, eighty applications were in hand.

In June, 1970, the first graduating class of the AAS (Business) Program received their degrees, some twenty-one people will have earned diplomas. The original class size in Sept., 1966, was some sixty students, with ten or so dropping out within the first two or three weeks.

At least 3/4 of the graduating class have indicated their inten-

tion of going on for a baccalaureate and the majority of the graduating class have made application to the NYU School of Commerce.

Current Status of the Program: There are now 150 students enrolled in the program. 15 will complete the Associate in Applied Science Degree at the end of the Summer, 1970, (the first graduating class). Of the 15, 13 applied to upper divisions of NYU to complete the Baccalaureate Degree.

SHASTA COLLEGE (Redding, California)

January, 1972.

Regional Campus Project  
Office of Continuing Education  
Chico State College  
Chico, California 95926

Contact: Dr. Ralph Mills, Vice President in Charge of Academic Affairs

Remarks: (As reported by telephone.) The program is in the context of external programs. The transportation, faculty salaries, classroom space are from the three community colleges. Nothing extra is used. The community colleges offer their library, inter-library and audio visual facilities as a "service to the community and the citizens in their area."

#### General Costs

1. Cost to student/unit in Extension: \$19.00/unit  
Summer session: 24.00/unit

2. Faculty in Extension Salary:

Instructor and Assistant Professor:

\$300.00/unit

Associate and Full Professor:

\$379.00/unit

3. Summer Faculty Salary Rate:

Instructor: \$272.00

Assistant Professor: 300.00

Associate Professor: 379.00

Full Professor: 484.00

4. Summer Program: There is a 30% increase in faculty salary for each of ranks where the faculty has to change residence to take the assignment. Their own faculty is generally used, however, they usually have 5% or less faculty from other state colleges.
5. Books: Can only be estimated. Many students get fees and book costs. Law Enforcement and other programs participate.

The most they get is \$5.00/unit or not over \$10.00/cost. The "Leed" program allows that much at least under the Federal Government Social Welfare Program.

6. Colleges involved in this program are Shasta in Redding, Lassen in Susanville, and Yuba.
7. Fullerton is now starting a Master in Public Administration Program. Must raise fees to reeinfince the college system to \$35-\$40/unit.
8. Chico Program is called "Overload." Teacher has regular teaching load with 3 units overload.
9. Note that the Official Degree Program for the California State College System began in the Fall, 1971, but unofficially in 1968. It is entirely on the regular system in the Extension and Summer Session. The cost factor is not singled out. A project is just beginning to analyze costs. John Ebbling is the off-campus coordinator.
10. The External Degree Program offered through the Office of Continuing Education, is supported entirely from student fees and receives no support from State sources. The curriculum is made up of a combination of extension and summer session courses. External degree students will, therefore, be required to pay the regularly established extension and summer session fees on a course-by-course basis. While fees are subject to change, the present fees for the Chico State College Regional Campus Project are as follows: Extension courses, \$19.00/unit; Summer Session Courses, \$24.00/unit.

STATE OF CALIFORNIA (DEPARTMENT OF EDUCATION)

January, 1972.

Bureau of Adult Education  
State Education Building  
721 Capitol Mall  
Sacramento, Calif. 95814

Contact: E. M. DeGabriele, Chief, Bureau of Adult Education

Remarks: They have no degree programs involved in their department, however, they have sent a copy of Schedules I and II pertaining to income and expenditures for 1970-71 in classes for adults in high school and unified districts. From these figures it is possible to extrapolate the kind of information that is useful in projecting conventional costs for non-traditional programs.

UCLA: VETERANS' PROGRAM

March, 1972.

University of California at Los Angeles  
UCLA Extension

Contact: Rosalind Loring

Remarks: Budget is not available, only general figures can be released.

1. Students pay \$500.00 tuition for period of 3 months, full-time program, approximately 19 units, 1/4 credit.
2. Tuition includes:
  - a. Tutoring and Counseling
  - b. Textbooks and all program material
3. Teachers are paid on basis of extension rates; whether they are non-faculty or faculty is basis for payment.
4. Counselors receive about \$10.00/hour.  
Tutors receive \$3-\$4/hour. These are para-professionals who were graduates of the program.
5. Rental of facilities is \$7.50/one-half day for a room.
6. Clerical, phones, rent, etc. are included in the \$500.00.

It should be noted that UCLA in a regular degree program could not do anything this inexpensively.

UNION FOR EXPERIMENTING COLLEGES AND UNIVERSITIES  
UNIVERSITY WITHOUT WALLS

January, 1972.

Antioch College  
Yellow Springs, Ohio 45387

Contact: Samuel Baskin, President

Remarks: At the present time, there is no cost analysis data available. In the interim, they have sent excerpts on costs from their original proposal. (See next pages.)

XVII. BUDGETS

A proposed budget for the Developmental Year (each institution) is shown on page 41. These budgets are meant to be representative of categories of expenses anticipated. It is expected that institutions will want to reallocate or re-order expenditures within particular categories (but staying within the \$125,000 figure proposed for each institution for development), depending on their particular program planning needs, and the form their UWW unit will take. Pages 40-44 present budget projections for the Central Coordinating Agency over a five year period and for research on the program over the same period. Illustrative budgets, projecting income and expenditures over a three-year period, once the program has become operational, and using a tuition base of \$2,650 for each of three successive years, are shown on pages 45-48.

Allocation from UWW tuition for scholarship aid	55,000
Overhead (20%)	74,960
Contingency	27,240
	\$ 477,000 =====

\* Note: This constitutes full "teaching" load; see pages  
 17-18 of proposal.

UNIVERSITY CENTER FOR ADULT EDUCATION  
WAYNE STATE UNIVERSITY - THE UNIVERSITY  
OF MICHIGAN

August, 1970

Remarks: A Proposal is presented for a New Bachelor's Degree Program.  
(See next pages.)

Attention is called to the following with regard to Expenses:

1. Only the planning period can be specified with assurance. Planning itself may well dictate changes in necessary staffing and of modification of program which would, of course affect the budget projection for the expended five year period.
2. The figures given are in terms of 1970 dollars.
3. The "Indirect Costs" listed represent 25.52% of salaries listed under "Administrative Personnel," excepting the headings "Consultants-Faculty-Community" and "Fringe Benefits."

The percentage is the "off-campus rate" of Wayne State University. By agreement with the University of Michigan, Wayne is the fiscal agent for UCAE.

Income: The sharply escalating commitment from the Universities represents a significant policy commitment from both institutions: Given satisfactory evaluation at the several stages, the Universities thus indicate their active interest in the future development of the new degree program. As can be seen, considerably more than the "Indirect Costs" shown under Expenses are, after the planning period, to be committed by the two Universities.

(UCAE/Aug. 1970; Appendix B/Page 2)

- I Planning Period - Oct. 1, 1970-June 30, 1971
- II Fall Operation & Research Phase - July 1, 1971-June 30, 1974
- III Research Phase Out and Final Evaluation - transfer of program to other operating units of Wayne State University and/or University of Michigan

UNIVERSITY OF SOUTH FLORIDA

March, 1972.

Bachelor of Independent Studies  
Adult Degree Program  
Tampa, Florida 33620

Contact: Kevin E. Kearney, Ph.D., Director

Remarks: The program has been operational since 1969, and they have for the most part (administrative staff and operating expenses) been subsidized through the Office of Academic Affairs.

Instructional costs have been paid from revenue.

More specific data at this point is unavailable because they have not yet completed the pilot experience and because the funding formula may well be subject to change in the near future.

Reactions to Request:

"It would be most helpful if you could furnish us with a report of your findings. As I have said, this kind of thing needs to be done but we are not as yet in a position to produce an accurate analysis."

UNIVERSITY X

Remarks: This university's program is in the proposal stages and it does not wish to make its budget public at this time. The costs are estimated on the basis of a quarter period.

Preliminary Budget

Departmental Staff	\$ 12,000
Instructors	22,500
Instructional Material	5,300
Office Supplies and Telephone	3,100
Rent	4,500
Administrative Overhead	3,800

The budget is based upon an enrollment of 100 undergraduate students, with a cost of \$500.12/student.

UNIVERSITY XX

(Cannot be identified at this time)

General Remarks:

1. The costs of the first two years of the program are \$1300/student/year. The last four years may have been running \$1500.

The intake has been less than 60 students/year and at the present time there are 115 enrolled. It should be noted that students do not all enroll for a full four levels but often are not full time students, taking perhaps only three levels or twenty-four credit hours in a year.

2. The deficit figures are net deficit against net direct costs. There has been no attempt to apply any institutional overhead percentage, thus, in reality, the real net loss is significantly higher.
3. Note that the instructional cost is significantly higher per student; this is simply the result of an extremely rich compensation formula which allows faculty participating in the program to be annualized at the rate of 1.375 x their academic base salary. Since faculty are senior faculty, the program is an excellent one, but the costs are high. All faculty are full-time, University tenured faculty. As the institution moves into the Business Administration track and begins the first stage of developing the MBA degree in an independent study framework, it is anticipated that the extra rich faculty compensation formulas may have to be re-examined.

SECTION C

Additional Resources For External Degree Program Data

The following list of references is offered as sources of additional information on the costs of existing or proposed special and external degree programs. On the basis of the data in hand, there is every indication that given sufficient time and funds, detailed accounts of the costs of the ongoing programs and budgetary projections for proposed programs could be made available. The attitude of the administrators who have already responded to inquiries regarding their programs, reveals a tremendous willingness to cooperate with reasonable requests from those seeking data, and a strong desire to exchange information.

1. NEW YORK INSTITUTE OF TECHNOLOGY: Director William Smith, Cooperative program with National Too and Die Machining Assoc.
2. MARK HOPKINS COLLEGE, Vermont: Founder Walter Hendricks, College with "no teachers, no classes, no lectures, no examinations, no credits, etc." 30 students.
3. OPEN UNIVERSITY: Being planned in Massachusetts, Fall, 1933.
4. UNIVERSITY WITHOUT WALLS: HEW, Ford Foundation, and U.N., are funding UWW, may have additional cost studies. Proposed by Gov. Sargent, Exec. Deputy Commissioner Peter Muir.
5. NEW YORK STATE EDUCATION DEPT.: Offers A.A. and B.A. in Business Administration to anyone who can pass comprehensive exams. (No campus, courses, tuition).
6. UNIVERSITY OF NEBRASKA: Dr. Robert Ross, Head of Feasibility Study of External Degree Program. University of Nebraska, Lincoln, 63508 or Omaha, Division of Academic Studies, College of Continuing Studies.
7. CITY OF NEW YORK (CCNY): System-wide degree. Option of courses from any college system, leads to B.A.
8. UNIVERSITY COLLEGE, SYRACUSE UNIVERSITY, New York: 610 E. Fayette St., Syracuse, New York, 13202, in cooperation with ERIC Clearinghouse on Adult Education, 107 Ramey Lane, Syracuse, N.Y.
9. CENTER FOR CONTINUING EDUCATION, THE CLAREMONT UNIVERSITY CENTER: Pioneering M.A. degree in Liberal Studies. Harper Hall #160, Claremont, Calif. 91711.
10. MICHIGAN STATE UNIVERSITY: Continuing Education Service, East Lansing.
11. METROPOLITAN COLLEGE, BOSTON UNIVERSITY: Bachelor of Liberal Studies and Bachelor of Applied Science.
12. MILLARD FILMORE COLLEGE: Evening and Adult Division of State University of New York at Buffalo.
13. FEDERAL CITY COLLEGE: "Weekend College." Degrees the same as those issued Weekday students. Washington, D. C.
14. RUTGERS: New Brunswick, New Jersey.
15. UNIVERSITY OF PITTSBURGH
16. NATIONAL EDUCATIONAL FINANCE PROJECT: Project Director, R. L. Johns. 1212 S. W. 5th Avenue, Apt. 5, Gainseville, Florida. Has series

of publications among which is "Alternative Programs for Financing of Education," "Future Directions For School Financing" (limited information on adult programs).

17. NATIONAL COLLEGE, INC.: seems to be related to Rollins College. Dean of School of Finance and Business Administration at Rollins, engaged in \$100,000 feasibility study of Program of Examination and Certification. National College, Inc. was created by charter of State of Florida.
